AUDIT TYPE:

Announced Audit

AUDIT EXECUTIVE SUMMARY:

Packaging audit of cape gooseberry (physalis) and fresh tropical fruits. The facilities and operational steps were inspected from product reception to dispatch of the finished product. The product arrives from the field in plastic crates. At reception, it is weighed and assigned a single traceable lot. Then, it moves to the selection room, packaging, and manual weighing. Then, it is placed in cardboard boxes and final labeling. Subsequently, the product undergoes quality control before moving to the processing plant and dispatch to markets. Support facilities were also inspected, such as the packaging material warehouses, cardboard warehouse, chemical products, restrooms, changing rooms, and cafeteria. The documentation system, manuals, procedures, policies, records, and microbiological analysis were reviewed. The products are produced in-house and from third-party suppliers; the countertops and packing areas are made of stainless steel. The products are not washed and no post-harvest treatment is performed. At the time of the audit, there were 60 employees working, storage is in cold rooms, and allergens are not handled.

Addendum(s)/Module(s) included in the audit:

Not Applicable

Product information for each product

Product Group/Product Name	Observed Product	Seasonality	Country of destination for product
Cape Gooseberries (RTE (Ready to eat))	Observed on the day of audit	Year round	European Union
Passion Fruit / Granadilla / Maracuya	Not observed but of a similar risk type to what was observed*	Year round	European Union
